

PR for precision in bending

Bystronic

Exclusive pressure reference technology

- Improves your bend accuracy
- Reduces your set up time
- Virtually eliminates test bending

Tired of fighting material variances?

With the PR Series press brake, you can now achieve accurate, first time bends regardless of surface irregularities.

Exclusive pressure reference technology with new Integrated Process Control (IPC) delivers even better automatic thickness measurement and springback compensation. A revolutionary system that effectively eliminates test bending, giving you a better bend in less time.

The PR Series press brake – *engineered to save you time and money*. Please call 800-247-3332 to arrange a custom demonstration.
